

The 18" Blinker Kit (2180-32000) includes:

***STOP/SLOW BlinkerPaddles flash for safer work zones!***

**90 day warranty**

TAPCO has also applied our BlinkerSign™ technology to our STOP and SLOW paddles. Eight super-bright LEDs on each face flash a warning in unison, dramatically increasing the paddles's conspicuity.

- 60" PVC, four piece staff 2563-00003

Federally Compliant. TAPCO's BlinkerPaddles™ conform to MUTCD specifications. The LEDs match the sign's background color and shape, allowing drivers to react sooner. The LEDs flash in unison, sixty times per minute. BlinkerPaddles™ can flash their warning all day long, and they are especially effective in rain, fog, snow, and during low light conditions.

Light Weight, minimizes arm and wrist stress. The 18" BlinkerPaddles™ weighs less than two pounds, and the 24" model weighs less than 3-1/2", reducing arm stress while maximizing safety. A conveniently placed thumb switch allows you to switch either face (or both faces) on or off easily and instantly, and allows you to select single-flash (60 flashes per minute or Triple-flash™ (180 flashes per minute) at will. Additionally, a gravity switch allows you to simply lower the BlinkerPaddle™ to turn it off, then raise it to turn on again, saving effort and prolonging battery life.

*\*Every paddle includes three AA NIMH batteries, plus wall charger and cigarette lighter charger, and trunk strap.*

- Bag for 18" BlinkerPaddle™ 2563-00004

- STOP/SLOW BlinkerPaddle™ Engineer Grade Sheeting 2180-00320

## Flashing LED Paddles deliver a bright warning to protect children and workers!

**Brilliant Technology.** TAPCO has also applied our BlinkerSign™ technology (pages 2-7) to our STOP and SLOW paddles. Eight super-bright LEDs on each face flash a warning in unison, dramatically increasing the paddle's conspicuity.

**Federally Compliant.** TAPCO's BlinkerPaddles™ conform to MUTCD specifications. The LEDs match the sign's background color and shape, allowing drivers to react sooner. The LEDs flash in unison, sixty times per minute. BlinkerPaddles can flash their warning all day long, and they are especially effective in rain, fog, snow, and during low light conditions.

**Light Weight, minimizes arm and wrist stress.** The 18" BlinkerPaddle weighs less than two pounds, and the 24" model weighs less than 3 ½ pounds, reducing arm stress while maximizing safety. A conveniently placed thumb switch allows you to switch either face (or both faces) on or off easily and instantly, and allows you to select single-flash (60 flashes per minute) or Triple-flash™ (180 flashes per minute) at will. Additionally, a gravity switch allows you to simply lower the BlinkerPaddle to turn it off, then raise it to turn it on again, saving effort and prolonging battery life.
